## New Model 580

LARGE BED OR FIELD PLANTER DESIGNED FOR NURSERIES AND FLOWER GROWERS

The Model 580 is similar to our Model 550LU, but with a much larger pocket and a wider 3" shoe. This unit is designed to handle broad rooted plants, such as daylilies. The Model 580 can be used as a single row unit or in a multi-row system on a toolbar with rows as close as 22". The Model 580 can also be used in our bed planter frame with rows as close as 11" apart. The Model 580 utilizes our positive spacing float wheel drive front hitch, which also prepares the soil in front of each unit.

### Features of the Model 580

- Large diameter disc with large V-3 style pockets for big, bulky plants with up to 18" tops and 7" deep root systems
- Deep 10" suction point shoe that is 3" wide inside
- Plant spacing starts at 5-1/2"
- Row spacing when mounted on toolbar starts at 22" apart
- Row spacing when mounted in bed planter frame starts at 11" apart
- Direct Drive float wheel drive system
