## MODEL 912 & 948 MULCH PLANTERS

The **NEW** Model 912 and 948 Mulch Planters are designed for planting cell type plants through plastic mulch. It has more accurate depth control and a wider range of plant spacings than other mulch planters and water wheels. Operators hands stay free of water and chemicals while sitting in an upright and comfortable position.

### Standard Features:

- \* Gauge wheel drive system for accurate depth control and spacing
- \* Scissors hitch with adjustable springs to control amount of packing weight on rear wheels. It also gives uniform depth control in uneven ground.
- \* All weight of operator and plants is carried on the toolbar so unit weight never changes
- \* Smooth adjustable packing wheels for packing and easy depth control
- \* Plants on raised beds or flat ground
- \* Choice of flat trays or carrouseles for holding plants
- \* *Model 948 has larger disc for wider spacings*

### Options:

- \* Automatic water valve, barrel and mounting brackets
- \* Cushion seat
- \* Extra pockets, beyond standard three, for achieving closer spacings
