

Mechanical Transplanter Co.

MODEL CT-12

The Model CT-12 is the largest Christmas Tree Planter manufactured by Mechanical Transplanter Company. The CT-12 has many features that make it unique. A coulter shoe arrangement was designed for use in heavy soil. A 32" coulter runs in front, followed by a suction point subsoiler tooth bolted to a 14" deep shoe. This arrangement allows for planting in sod covered or worked conditions. The direct direct gauge wheels provide accurate plant spacings and proper depth control. Large offset pockets are also included for the handling of plants up to 30" in length. Each CT-12 planter comes complete with extra large plant boxes, cushion seats, weight brackets for additional weight, protective foot rests, stands, Category I or II three point hitch, and choice of rubber or steel packing wheel.

| Spacing Chart | | | | | |
|---------------|-----------|-----|-----|-----|-----|
| Pockets | Sprockets | | | | |
| | 7 | 8 | 9 | 10 | 11 |
| 2 | 60" | 72" | 75" | 80" | 94" |
| 3 | 40" | 45" | 50" | 55" | 60" |

Spacings will vary due to soil conditions
